---

The edition of this long running Radio 4 programme on 28th December 2008 featured **Kiln Farm** fame at last! The programme relayed the background to our arrival on Alderney and the development of the business, into the provision of meat and milk products to the residents on Alderney and, a developing market for our yoghurt and butter to Guernsey, as well as our butter to England.

Hopefully, what came across in the programme (apart from our hard work) was also our pleasure in working with the Guernsey cow. It's just a shame the recording isn't the full three-and-a-half hours edited down to under 25 minutes! Consider yourselves spared!  If you missed the programme initially, it is still available to listen to from BBC Radio 4's website, as a Real Media audio file (note: the streaming media player should auto-start and has controls for stop/start etc) click the Read More link to go to the full article including the media player ...
